JOURNAL OF MOLECULAR ELECTRONICS VOL 5 (1989)

Contents of Volume 5

Number 1 January–March 1989

Special Issue:
International Conference on Electronics of Organic Materials (ELORMA), held in Tashkent, USSR, 16–21 November 1987

Langmuir–Blodgett Films of Potential Donor–Sigma–Acceptor Organic Rectifiers *R. M. Metzger and C. A. Panetta* 1

Photoexcitation in Poly(phenylenevinylene) *D. D. C. Bradley and R. H. Friend* 19

Organic Conductors and Superconductors Based on Bis(ethylenedithio)tetrathiafulvalene and its Derivatives *É. B. Yagubskii and R. P. Shibaeva* 25

Electron-donating Ability of Tetrathiafulvalene Derivatives Investigated by Cyclic Voltammetry *V. Khodorkovsky, A. Edžina and O. Neilands* 33

Phase-slip in Charge Density Waves in Small Samples of Quasi-one-dimensional Conductors *F. Ya. Nad' and S. V. Zaitsev-Zotov* 37

Stark Spectroscopic Technique for Probing the Local Field in Dielectric Langmuir–Blodgett Films *L. M. Blinov, S. P. Palto and S. G. Yudin* 45

Photoinduced Optical Anisotropy in Langmuir–Blodgett Films *M. I. Barnik, V. M. Kozenkov, N. M. Shtykov, S. P. Palto and S. G. Yudin* 53

Synthetic Features of Structure Formation of Polyacetylene *A. A. Matnishyan and L. S. Grigoryan* 57

Solar Energy Conversion Based on Polymers *A. V. Vannikov and T. S. Zhuravleva* 63

Spectroscopy of Traps for Current Carriers in Molecular Materials *S. Nešpůrek and J. Sworakowski* 71

Peierls Instability in One-dimensional Systems *V. Ya. Krivnov and A. A. Ovchinnikov* 79

Number 2 April–June 1989

Ion Beam Modification of Electrophysical Properties of Polydiacetylene Crystals *T. S. Zhuravleva, A. V. Vannikov, O. L. Lazareva, A. N. Schegolichin, G. A. Vinogradov, V. A. Ryaboshapko and L. A. Evmenjev* 87

Electro-optic Effect and Raman Intensity in Molecular Crystals *A. N. Vtyurin, A. N. Botvich, V. G. Podoprigora, V. F. Shabanov and N. P. Shestakov* 93

Surface Pyroelectric Effect in Anthracene Films *Yu. P. Piryatinsky, M. V. Kurik and S. V. Zavatsky* 99

Unusual Diamagnetism in Aniline Black (Polyaniline) *J. J. Langer* 103

Conducting Defects in Langmuir–Blodgett Films *H. Matsuda, K. Sakai, H. Kawada, K. Eguchi and T. Nakagiri* 107

Non-linear Optical Properties of Organic Molecules: 5—Calculated Hyperpolarizabilities of 2-Pyrazolines and Related Systems *J. O. Morley, V. J. Docherty and D. Pugh* 117

Non-linear Optical Properties of Organic Molecules: 6—Calculated Polarizabilities of Conjugated Organic Systems *J. O. Morley and D. Pugh* 123

Thermally Stable High-field Molecular Multilayer Dielectrics Formed From an Amphiphilic Two-ring Phthalocyanine *J. D. Shutt and S. E. Rickert* 129

Structural Investigation into Multilayer Films of *N*-Octadecylpyridinium–TCNQ *A. S. Dhindsa, G. H. Davies, M. R. Bryce, J. Yarwood, J. P. Lloyd, M. C. Petty and Yu. M. Lvov* 135

Book Reviews 143

Forthcoming Meetings 145

Number 3 July–September 1989

Deposition and Electron Diffraction Study of Langmuir–Blodgett Films in Various Alternating Sequences of Molecular Layers *V. I. Troitskiy, V. S. Bannikov and T. S. Berzina* 147

Langmuir–Blodgett Films of Tetraynoic Molecules *P. S. Sotnikov, V. S. Bannikov, V. I. Troitskiy and A. Ya. Ilchenko* 155

Relevance of Light-induced Charge Displacements in Molecular Electronics: Design Principles at the Supramolecular Level *F. T. Hong* 163

Measurement of Non-linear Refractive Index of Polyalkylthiophene Films *T. Fukaya, A. Heinämäki and H. Stubb* 187

Electro-absorption Light Modulator Based on Persistent Spectral Hole Burning in a Light-guiding Configuration *N. Hartmannsgruber, U. Bogner and M. Maier* 193

Book Review 199

Forthcoming Meetings 200

Number 4 October–December 1989

Structural Studies of $(TMTSF)_2SbCl_2F_4$, α-$(BEDT\text{-}TTF)_2I_3$ and Some Organic Superconductors Found Recently *S. Kagoshima and Y. Nogami* 201

Study of Polyaniline Protonation in Solution *V. M. Geskin, Ya. A. Letuchy, B. Z. Lubentsov, L. M. Grundel, S. M. Tikhomirov and M. L. Khidekel'* 207

Physical Properties of β-$(ET)_2I_3$ Organic Superconductors *I. F. Schegolev and V. N. Laukhin* ... 215

A Novel Electroluminescent Molecular Diode: A Quantum Electronic Model of Bioluminescence *H. Sanchez* 221

Stability of Organic Thin Films on Inorganic Substrates: Prototype Studies Using Metal Phthalocyanines *A. Rager, B. Gompf, L. Dürselen, H. Mockert, D. Schmeisser and W. Göpel* 227

Nature of Photoinduced Optical Anisotropy in Molecular Layer Structures *Yu. B. Gaididei and A. S. Trofimov* 239

Experimental Study of Photoablation of Polydiacetylene Films *J. D. Magan, P. Lemoine, H. Byrne and W. Blau* 247

Forthcoming Meetings 255
